1 - ANALYSIS OF BRAZILIAN EXPORTS OF HIDES AND SKINS

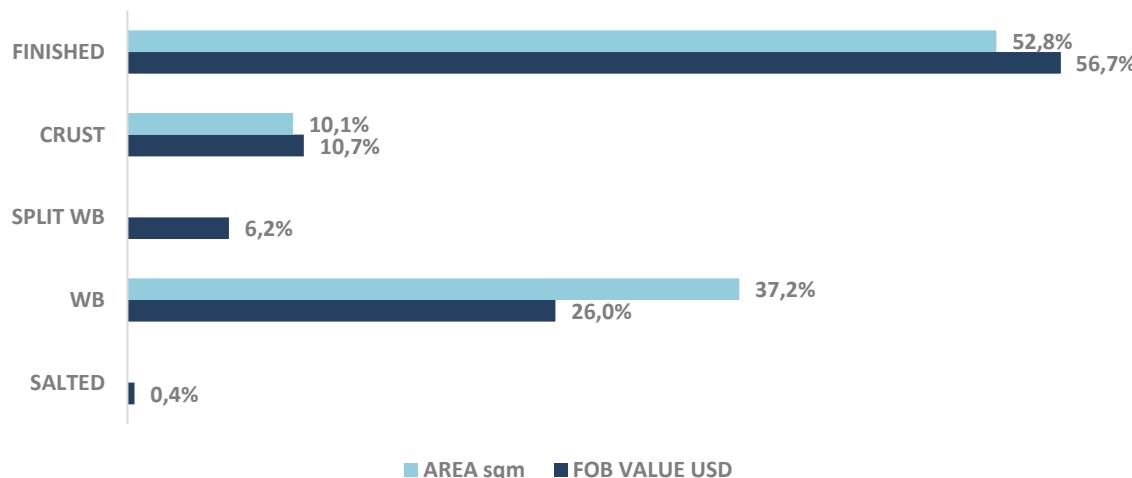

SEPTEMBER 2021

The Hides and Skins Exports released by SECEX (Foreign Trade Secretariat) of the Ministry of Economy, for the month of September 2021, amounted to US\$ 122.9 million, an increase of 46.9% year-on-year, when US\$ 83.7 million worth was exported. The value, however, was 3.8% below the previous month, when exports totaled US\$ 127.8 million.

Considering exports in square meters, during September were shipped 13.4 million, 16.1% lower year-on-year, and down 13.3% compared to the previous month, when total was 15.5 million.

The period from January to September ended with a total of US\$ 1.05 billion, 53.8% above the same period in 2020, and also an increase of 9.9% in traded area, with 133.2 million square meters.

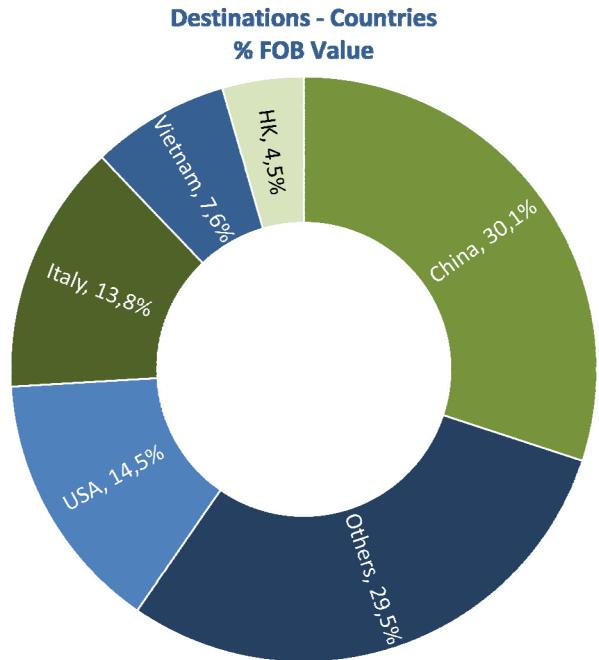

Below is the profile of 2021's bovine exports:

These are the variations of the Brazilian exports of bovine leather during total period of 2021, year-on-year:

- Salted hides with an increase of 33.5% (previously +36.1%) in value, but down 56.2% (previously -55.1%) in weight;
- Wet Blue increasing 59.0% (+62.5%) in value, but lower 20.8% (-16.6%) in area;
- Split WB with an increase of 55.5% (+51.6%) in value and 31.8% (+34.4%) in area;
- Crust up 56.6% (+54.1%) in value and 21.5% (+23.1%) in area;
- Finished with 51.1% (+51.9%) above in value, and +27.1% (+31.0%) in area.

Below are the 2021 destinations:

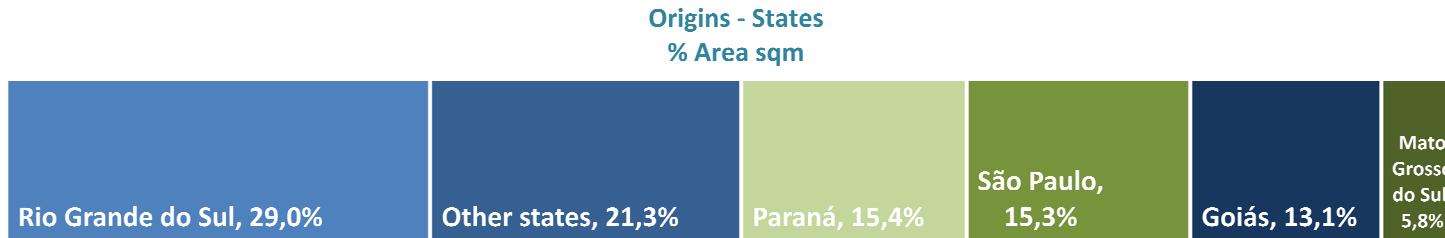

We highlight below the accumulated results for 2021 for the three main markets for Brazilian leather:

- China (without HK) now with a share of 30.1% (previously 29.8%) in value and 36.0% (previously 35.5%) in area, with a monetary increase of 72.2% (+72.9%) and also +15.6% (+18.1%) in area;
- United States with a share of 14.5% (14.8%) in value, now with 9.0% (9.2%) in area, has a monetary increase of 23.4% (+25.1%) and also 7.7% (+11.6%) in area;
- Italy, with a share of 13.8% (14.0%) in value and 14.9% (15.2%) in area, with growth of 39.6% (+45.9%) in value, but with a drop of 13.7% (-6.3%) in area;

While China shows an increase in share each month, with a growing concentration of leather exports to this destination, the United States and Italy reduce their share in value and volume. The values still show important and significant increases for the three main destinations, but the volumes are getting closer to equaling the levels of 2020, where even Italy continues to show a worrying fall and worsening every month.

Below is the participation in volume of the states of the federation with relevant exports for the sector in 2021:

Regarding the states, we can highlight the following:

- Export values from the ten largest states maintain double-digit growth, with the highest percentages coming from Minas Gerais, with +127.6% (previously +119.0%), São Paulo, with 74.7% (+78.4%), Paraná, with +68.0% (+68.9%), Rio Grande do Sul, +60.3% (+63.9%) and Ceará, with +54.4% (+ 66.6%). Mato Grosso, in 11th place, is very close to equaling the values exported in 2020, now showing only a 4.5% drop;

- Considering volumes, there are still three states with negative indexes: Pará, with -44.9% (-39.4%) in area and -44.8% (-38.3%) in weight; Mato Grosso do Sul, with a decrease of -33.4% (-33.4%) and in weight of -39.7% (-40.5%); and Bahia, with -12.7% (-5.6%) in area and -14.5% (-2.8%) in weight;

The four main exporting states are still Rio Grande do Sul, with 29.4% (previously 29.9%) of share in value, São Paulo with 16.4% (16.6%), Paraná with 14.7% (14.5%) and Goiás, with 13.2% (12.9%). About the traded area, Paraná again passes São Paulo, returning to second place, now with 15.4%, compared to 15.3% of the third place, and Goiás remaining in fourth, with 13.1% (12.9 %). In weight, the positions remained the same, with Paraná in second (17.3%), Goiás in third (16.1%) and São Paulo in fourth place (13.2%).

With the sum of exports in September, the sector has already surpassed the total exported in the entire year of 2020, accumulating US\$ 1.05 billion. The month of September was the second-best month of the year when we consider only exported values. However, regarding volumes, it was the highest drop both in weight and area, compared to the same month last year. About traded area, it was also the biggest drop compared to the immediately previous month, in addition to being one of the months with the lowest volume exported, gaining only from July this year. These indicators show the difficulties faced by exporters, with scarce supply of hides, high input prices, in addition to the lack of demand and logistical difficulties.

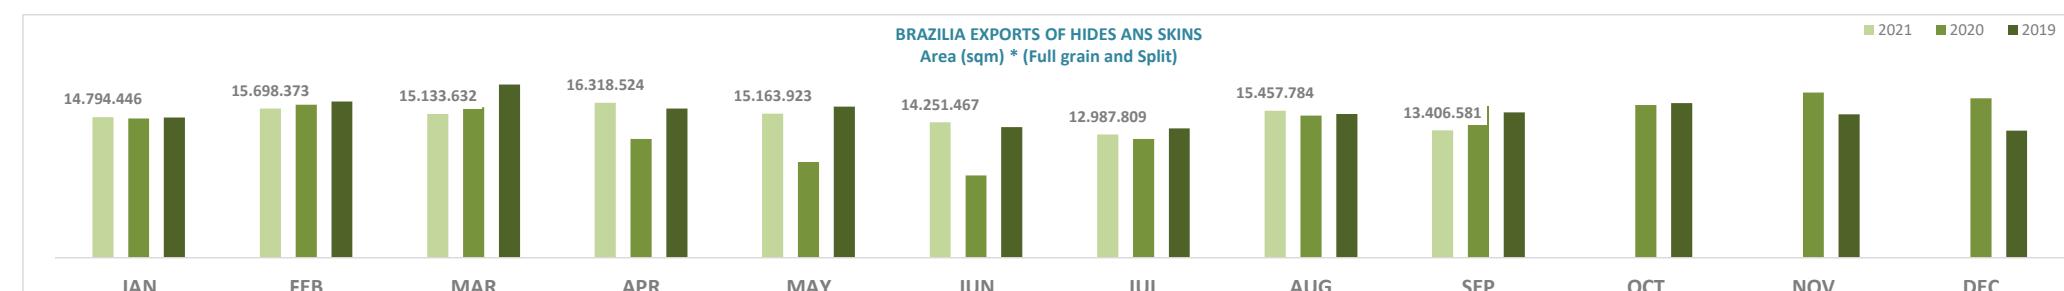

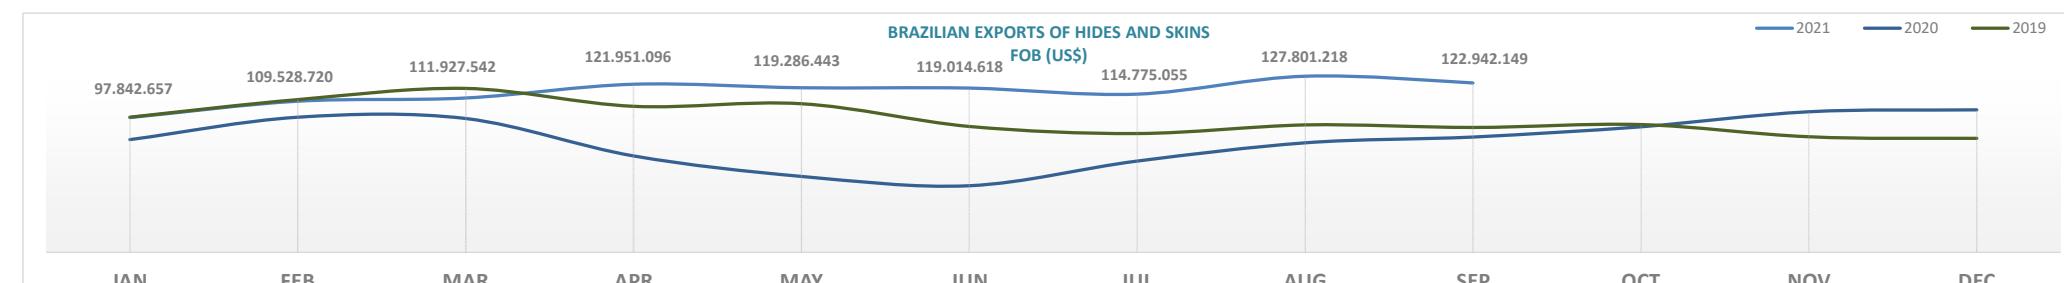

Analyzing exports by type of leather, Crust and Split Wet Blue showed improvements in values compared to the total accumulated up to August. Now Crust is growing 56.6% (previously +54.1%) and Split WB 55.5% (previously +51.6%). Regarding volumes, only Wet Blue has a drop over the same period in 2020, with -20.8%. –
