1 - ANALYSIS OF BRAZILIAN EXPORTS OF HIDES AND SKINS

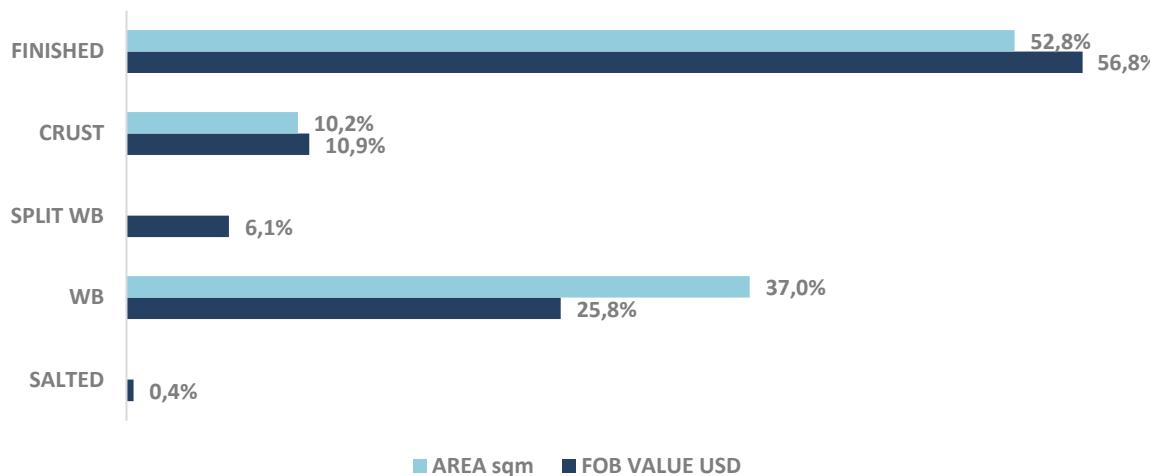

AUGUST 2021

The Hides and Skins Exports released by SECEX (Foreign Trade Secretariat) of the Ministry of Economy, for the month of August 2021, amounted to US\$ 127.8 million, an increase of 60.8% year-on-year, when US\$ 79.5 million worth was exported. Compared to the previous month, the result is 11.3% higher, when total was US\$ 114.8 million.

Considering exports in square meters, during August were shipped 15.5 million, 3.3% higher year-on-year, and also up 19.0% compared to the previous month, when total was 13.0 million.

The first eight months of the year ended with a total of US\$ 922.1 million, 54.8% above the same period in 2020, and also an increase of 13.8% in traded area, with 119.8 million square meters.

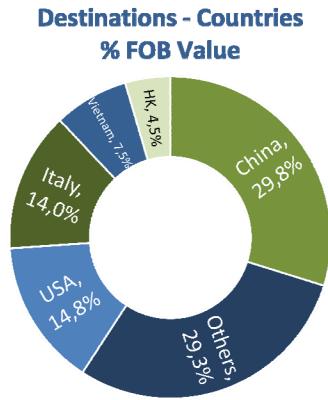

Below is the profile of 2021's bovine exports:

These are the variations of the Brazilian exports of bovine leather during total period of 2021, year-on-year:

- Salted hides with an increase of 36.1% (previously +47.8%) in value, but a drop of 55.1% (previously -48.6%) in weight;
- Wet Blue increasing 62.5% (+61.7%) in value, but lower 16.6% (-17.7%) in area;
- Split WB with an increase of 51.6% (+49.7%) in value and 34.4% (+36.8%) in area;
- Crust up 54.1% (+54.5%) in value and 23.1% (+28.3%) in area;
- Finished with 51.9% (+50.7%) above in value, and also +31.0% (+33.9%) in area.

Below are the 2021 destinations:

We highlight below the accumulated results for 2021 for the three main markets for Brazilian leather:

- China (without HK) now with a share of 29.8% (previous 29.7%) in value and 35.5% (previous 35.4%) in area, with a monetary increase of 72.9% (+72.0%) and also +18.1% (+20.9%) in area;
- United States maintaining a share of 14.8% (14.8%) in value, now with 9.2% (9.4%) in area, has a monetary increase of 25.1% (+26.5%) and also 11.6% (+17.4%) in area;
- Italy, with a share of 14.0% (14.6%) in value and 15.2% (14.5%) in area, with growth of 45.9% (+51.4%) in value, but still with a drop of 6.3% (-9.0%) in area;

Among the three main destinations, the performances remain very positive in terms of values, but show negative courses in volumes. Italy, despite being close to equaling last year's volume, still shows purchases of Brazilian leather with -6.3% in area compared to the same period in 2020. On the other hand, US and China show positive rates, but reducing the percentages each month. China dropped in area from +20.9% to +18.1%, and the United States dropped from +17.4% to +11.6%. Considering the thirty largest destinations, now only the UK has a drop in value compared to the same period last year, with -14.2%.

Below is the participation in volume of the states of the federation with relevant exports for the sector in 2021:

Origins - States
% FOB Value USD

Rio Grande do Sul, 29,9%	Other states, 21,1%	São Paulo, 16,6%	Paraná, 14,5%	Goiás, 12,9%	Santa Catarina, 5,1%
--------------------------	---------------------	------------------	---------------	--------------	----------------------

Regarding the states, we can highlight the following:

- Export values from the ten largest states continue to show positive rates, with the highest percentages coming from Minas Gerais, with +119.0% (previously +113.8%), São Paulo, with 78.4% (+70.9%), Paraná, with +68.9% (+76.5%), Ceará, with +66.6% (+74.4%) and Rio Grande do Sul, +63.9% (+65.9%);

- Considering to the traded volume, the state of Santa Catarina, which until July had negative rates, has now recovered shipments and is positive in both indexes, area and weight. However, there are still three states with negative rates: Pará, with -39.4% in area and -38.3% in weight; Mato Grosso do Sul, with an area in decline of -33.4% and in weight of -40.5%; and Bahia, with -5.6% in area and -2.8% in weight;

- The state of Mato Grosso, which is in 11th place in the ranking, has been showing negative indexes in values and volumes since the beginning of the year, generating concern regarding performance;

Considering values, there were no changes to the TOP4 state exporters, where Rio Grande do Sul remains the leader, with a 29.9% share (previously 30.2%), São Paulo with 16.6% (16.2%), Paraná with 14.5% and Goiás with 12.9% (13.2%). About traded area, São Paulo takes up second place from Paraná, now with 15.4% compared to 15.0% in third place, with Goiás remaining in fourth place (12.9%). In weight, the positions remained the same, with Paraná in second (16.7%), Goiás in third (15.8%) and São Paulo in fourth place (13.5%).

The value of exports this month was the highest since June 2018, when the country had exported US\$ 134.1 million. The result of US\$ 127.8 million in August this year meant a significant increase of 60.8% over August 2020, which had been the second month with recovery in Brazilian hides and skins exports after the strong impact of the pandemic. But we have to consider that the percentages of increases are now smaller, showing that the impetus perceived up to June, when we had +146.1% in value over June/20, is now softening and generating caution on the part of Brazilian exporters. About volumes, this analysis is even more evident, where the area sold is already practically the same as in 2020. Compared to the period from January to August 2019, there are still falls in area and weight, with -3.0% and -13.3%, respectively.

Analyzing the types of leather, only Wet Blue improved its performance in terms of value and volume compared to shipments accumulated until July. Now it is growing 62.5% (previously +61.7%) in value, with a drop of 16.6% (previously -17.7%) in area. We can see that the percentage of growth in value increased, and the drop in area, which was at -17.7%, has now reduced to -16.6%. The other types of leather worsened their performance, despite all still showing very positive rates over the same period in 2020 (except for salted hides).

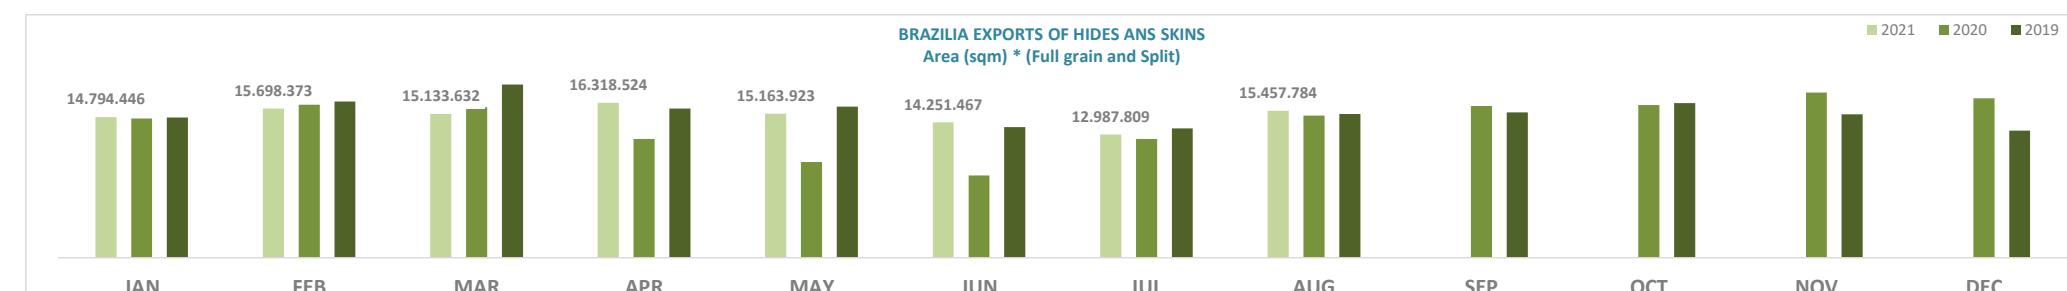

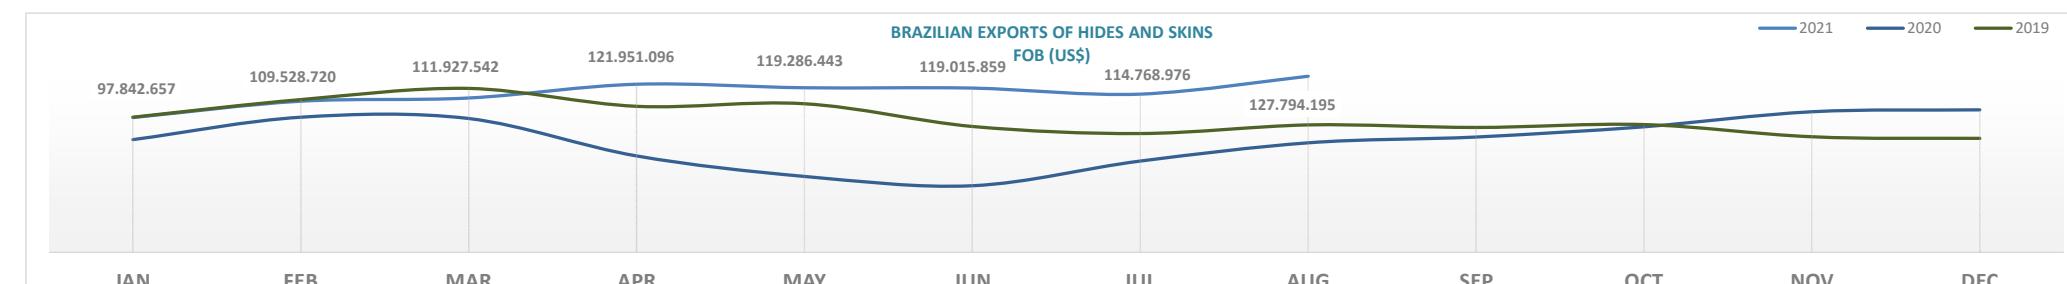

Highly negative factors this month were the continued increase in national hides, which was at \$ 0.74/kg in week 29 and surpassed the level of \$ 0.80/kg in week 35, and also the deterioration of transports (primarily to Asia), with historically high freight rates, added to the lack of vessels and containers. -
