1 - ANALYSIS OF BRAZILIAN EXPORTS OF HIDES AND SKINS

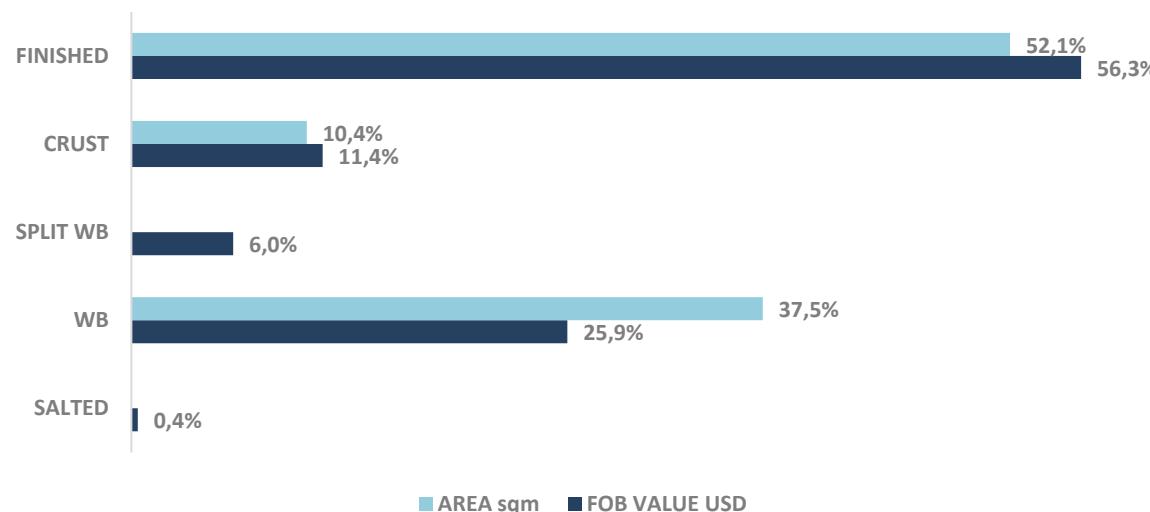

DECEMBER 2021

The Hides and Skins Exports released by SECEX (Foreign Trade Secretariat) of the Ministry of Economy, referring to the month of December 2021, registered the value of US\$ 121.5 million, which means an increase of 17.6% in compared to the same month last year, when US\$ 103.3 million were exported. The value was also 20.6% above the previous month, when exports totaled US\$ 100.7 million.

As for the total exported in square meters, in December 12.7 million were shipped, 24.1% below the same month in 2020, but 21.0% higher than in November, when the total was 10.5 million m².

The year ended with a total of US\$ 1.41 billion, an amount 44.9% above the same period in 2020, and 0.5% higher in Traded area, with 172.3 million square meters.

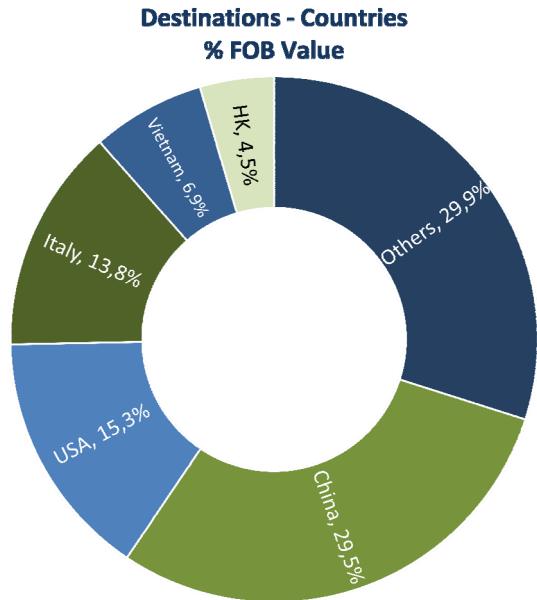

Below is the profile of accumulated exports for 2021:

There are the following variations in Brazilian exports of bovine leather by type, in 2021, compared to the previous year:

- Salted hides with an increase of 12.9% in value, but a drop of 60.1% in weight;
- Wet Blue growing 46.8% in value, but falling 24.9% in area;
- Split WB with an increase of 45.5% in value and 18.6% in area;
- Crust growing 60.9% in value and 15.6% in area;
- Finished with 41.5% above in value, and +12.5% in area.

Below are the main destinations for the period:

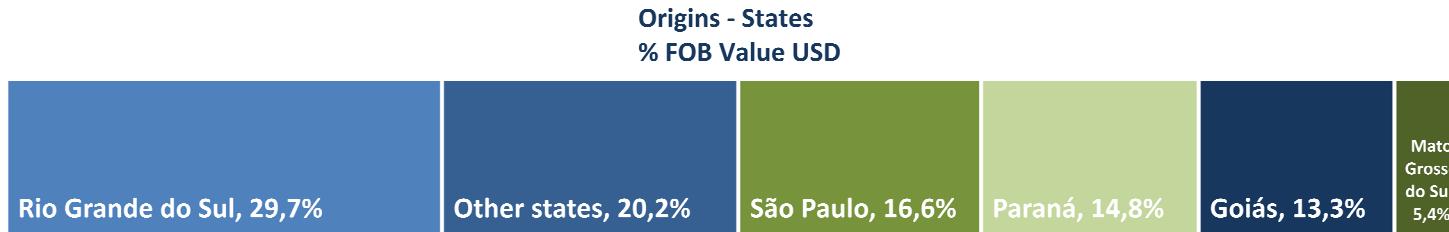

We highlight below the 2021 results of the three main markets for Brazilian leather:

- China (without HK) ended with a 29.5% share in value and 36.0% in area, with a monetary increase of 56.0% and +5.0% in area;
- Italy with a 15.3% share in value and 15.9% in area, with growth of 37.5% in value, but a drop of 17.0% in area;
- United States representing 13.8% in value, and with 8.6% in area, ended with a monetary increase of 14.5% and a drop of 4.4% in area.

With the end of the year, the three main destinations together represented 58.6% of the value and 60.5% of the area exported by Brazil. Compared to the previous year, there was a slight drop of 2.4 percentage points, as in 2020 the total was 61.0%. Even so, the dependence of national exporters on these countries is evident, showing that traditional customers are still important for the sector. On the other hand, this concentration of almost two-thirds in just 3 countries out of a total of 76 destinations, can represent a risk that could and should often be avoided, as economic or political turmoils, trade wars, logistical problems, among others, can affect business in a dizzying and worrying way.

Below is the share of the states of the federation with relevant exports for the sector in 2021:

Regarding the states, we can highlight the following:

- Export values from the ten largest states ended the period with significant growth, almost all showing double-digit rates, where the exception was Bahia, which kept the most modest percentage. Let's look at the most significant data in descending order: Minas Gerais, with +91.5%, São Paulo, with +65.2%, Paraná, with +54.0, Rio Grande do Sul, +53.0% and Goiás, with +43.8%;

- Considering the volume traded, the second half was decisive in the results of the ten largest exporting states, reducing and even turning negative the indexes achieved until June of this year. Analyzing the results of the first semester, we had only two states with decreases in area and one state with decrease in weight. At the end of the year, we have six states with negative percentages in area and seven in weight. The best results of the year in traded area were: Minas Gerais, with +45.7%, São Paulo, with +24.7%, Rio Grande do Sul, with +22.0% and Ceará, with +12.2% .

- Rio Grande do Sul ended the year as the absolute leader in exports, with almost double the value of second place. Gauchos exported 29.7% of the country's total leather, with São Paulo in second with 16.6%, Paraná in third with 14.8% and Goiás in fourth, with 13.3%. In terms of volume, the leadership is repeated, with 29.1% for companies from Rio Grande do Sul, 15.9% for Paraná, 15.5% for São Paulo and 13.2% for Goiás.

- It is important to highlight other states with important values and growth during the year, such as Rio de Janeiro, 12th in the ranking and 78.5% growth in value and 311.5% in area, and Piauí, 13th in the ranking, with values 54.4% above the previous year, and volumes 60.5% also higher.

The year 2021 was a period of recovery in exports, after the sector experienced six years of consecutive declines. Since the 2014 export record, there has been no growth in values. In terms of volumes, we had some positive periods, such as 2016 and 2017, but also in 2014 the largest exported area was registered, with around 211 million square meters sold. The 44.9% growth this year is extremely important, although the problems pointed out in the reports of previous months persist, with emphasis on the logistical bottlenecks, the low and worrying demand, in addition to the high costs of inputs and the main raw material.

Finally, as for the prices of leather types in 2021, there were improvements at all stages, with emphasis on Wet Blue Leather, which closed the year with an index 95.4% above the previous year. Among the leathers with the highest added value, Finished had an increase of 25.8% and Crust by 39.2%. -
